05 TEAM

06 CONCLUSION

about **OVERVIEW**

Streamlines operations and improves customer experience.
Details functionalities, architecture, and technologies used.

Improved Efficiency

- Streamlined Processes
- Faster Tasks

Enhanced Transparency

- Clear Pricing
- Trust Boost

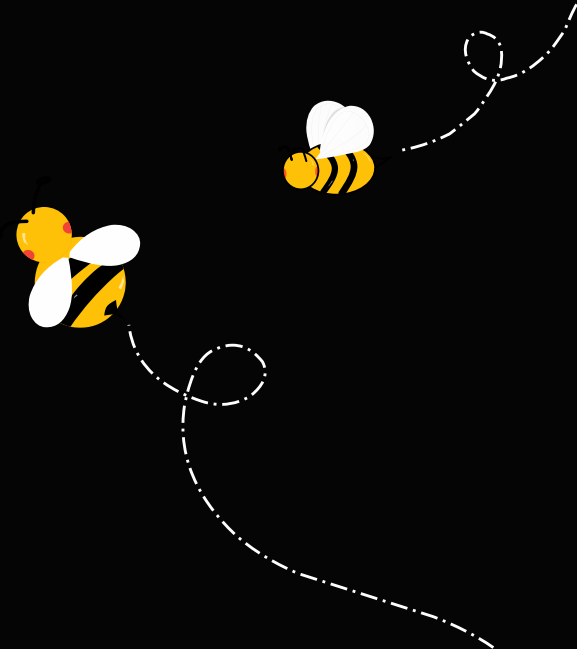

Streamlined Computer Allocation

- Efficient Monitoring
- Reduced Waiting

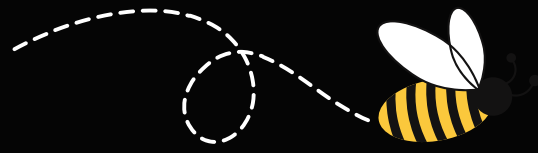

Valuable Data Accumulation

- Informed Decisions
- Operational Optimization

about GOAL & OBJECTIVE

about **DATABASE DESIGN**

01

Entities:

Users, Staff, Computer, Service, Orders, Order Detail, Bill

02

Relationships:

- Associations between entities
- Type: one-to-one, one-to-many, many-to-many.

03

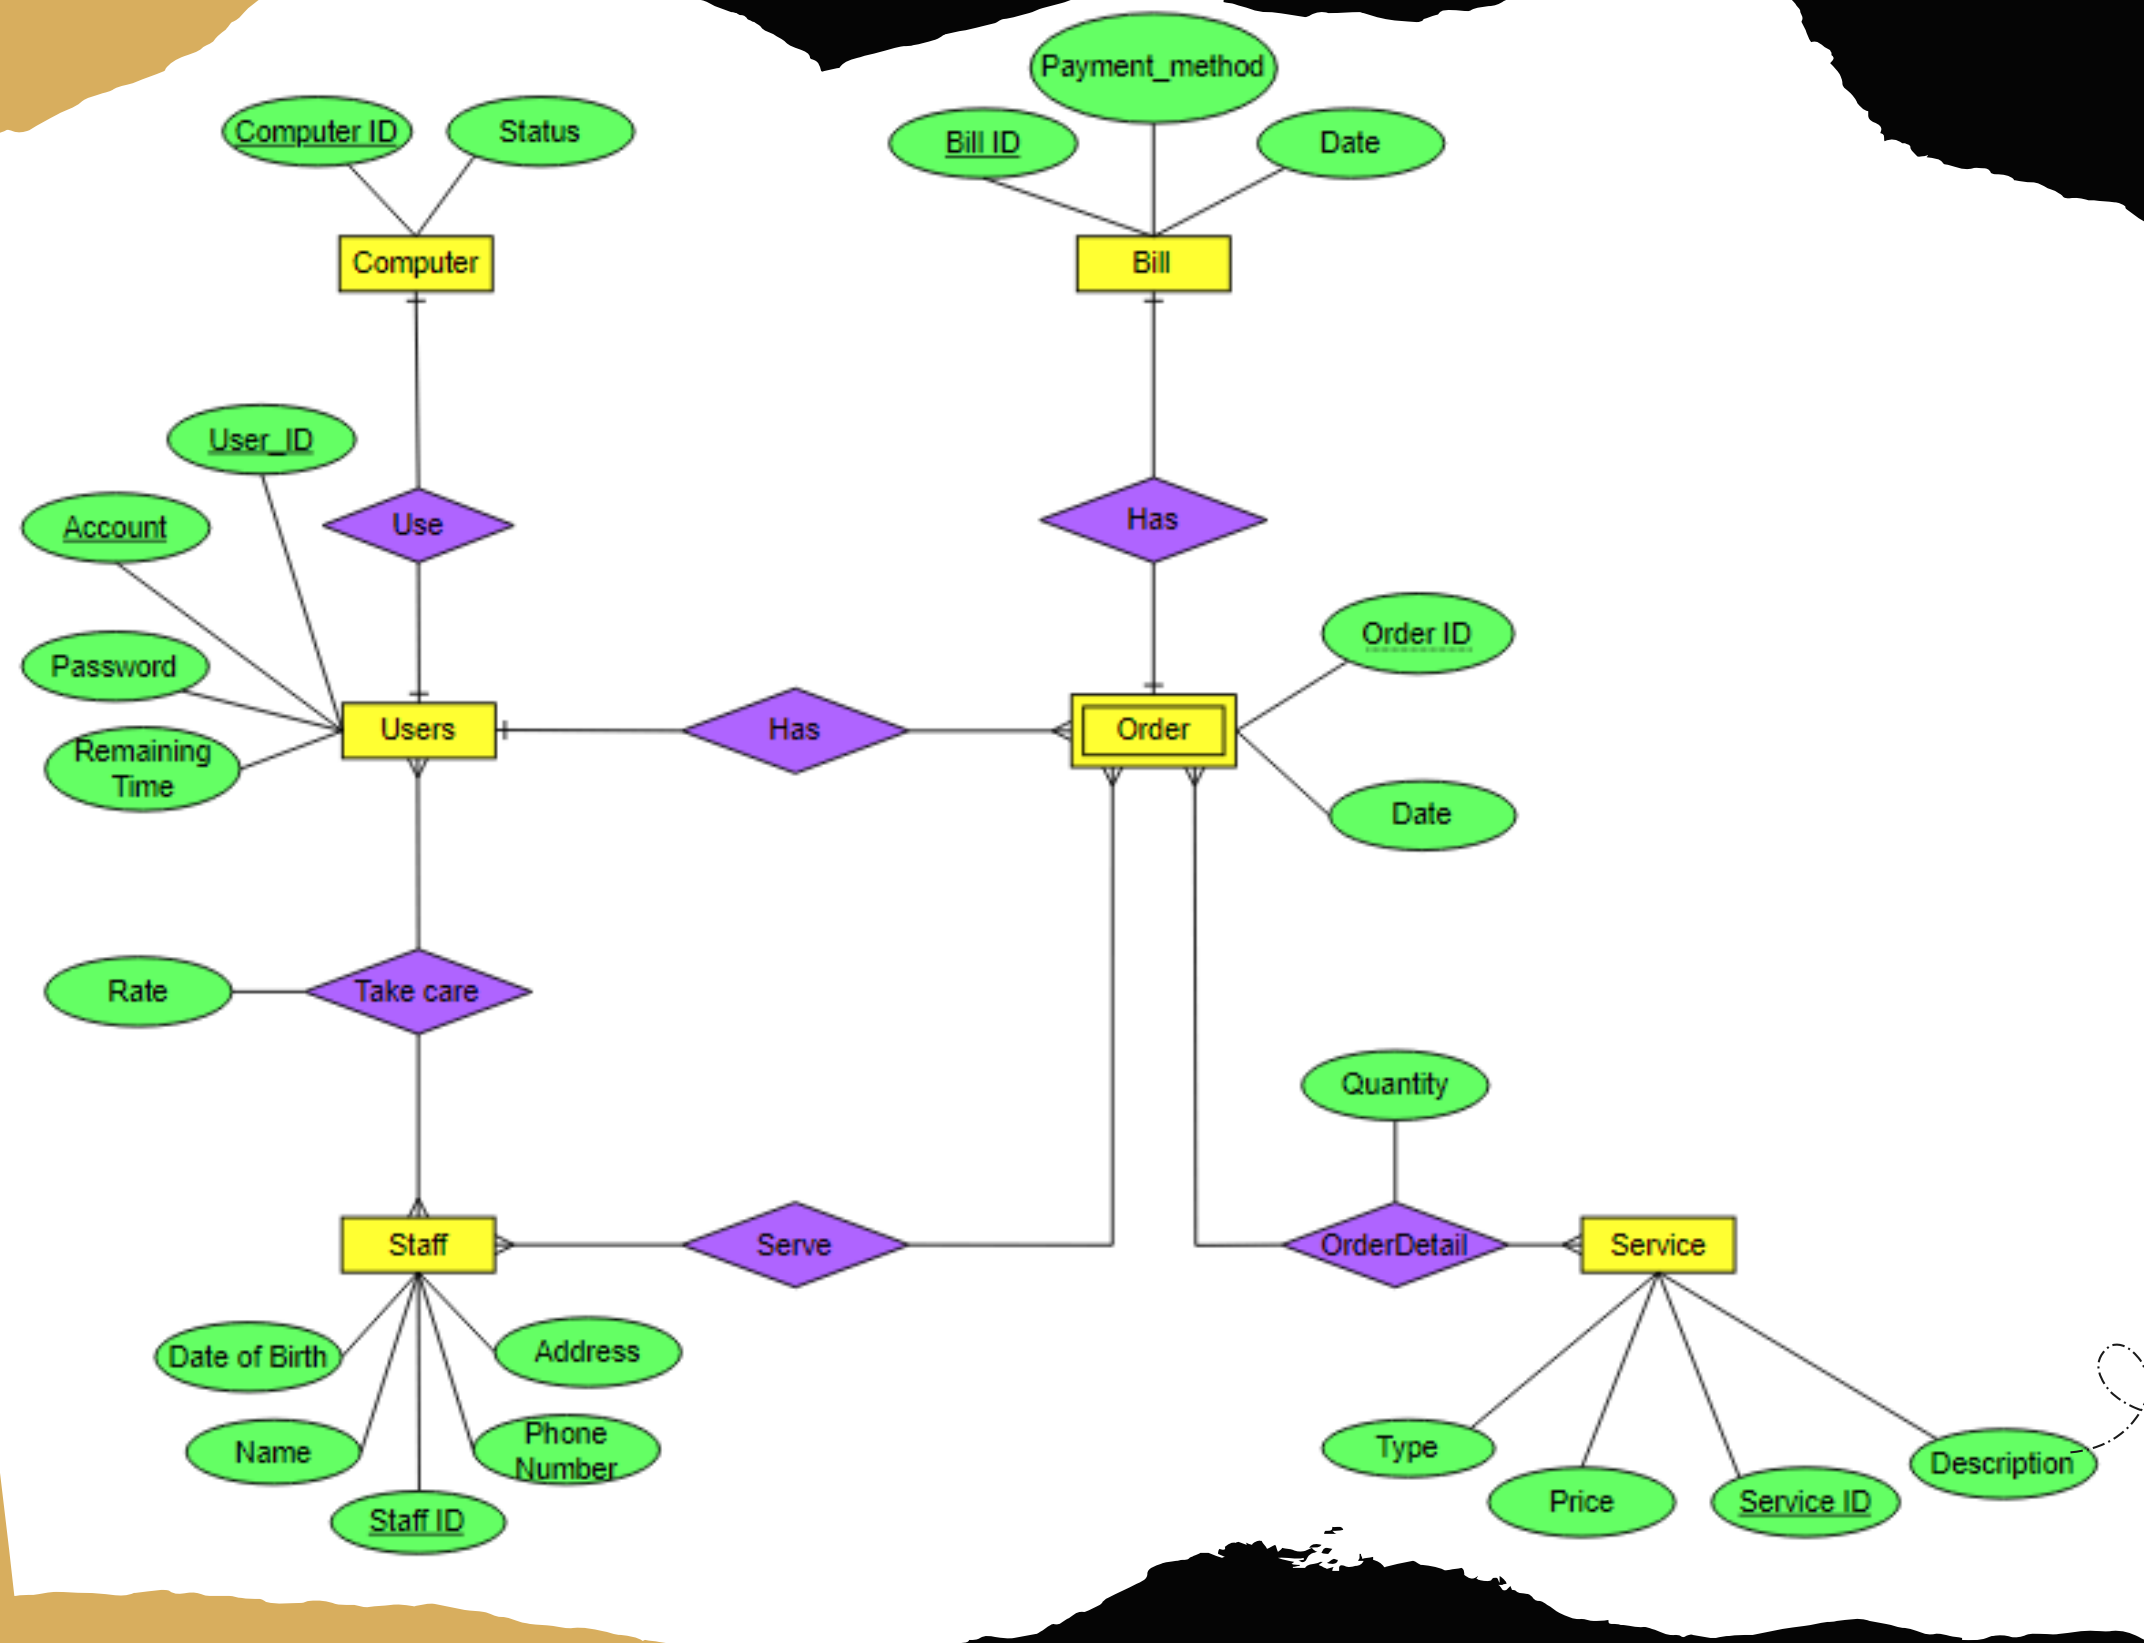

ER Diagram

Representation of entities, their attributes, and relationships.

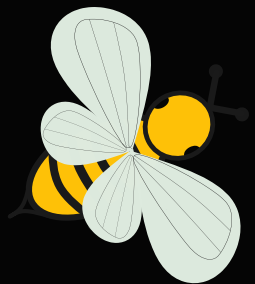

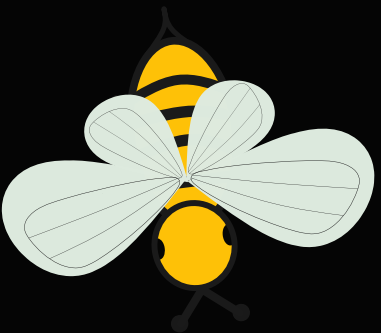

04

Class Diagram

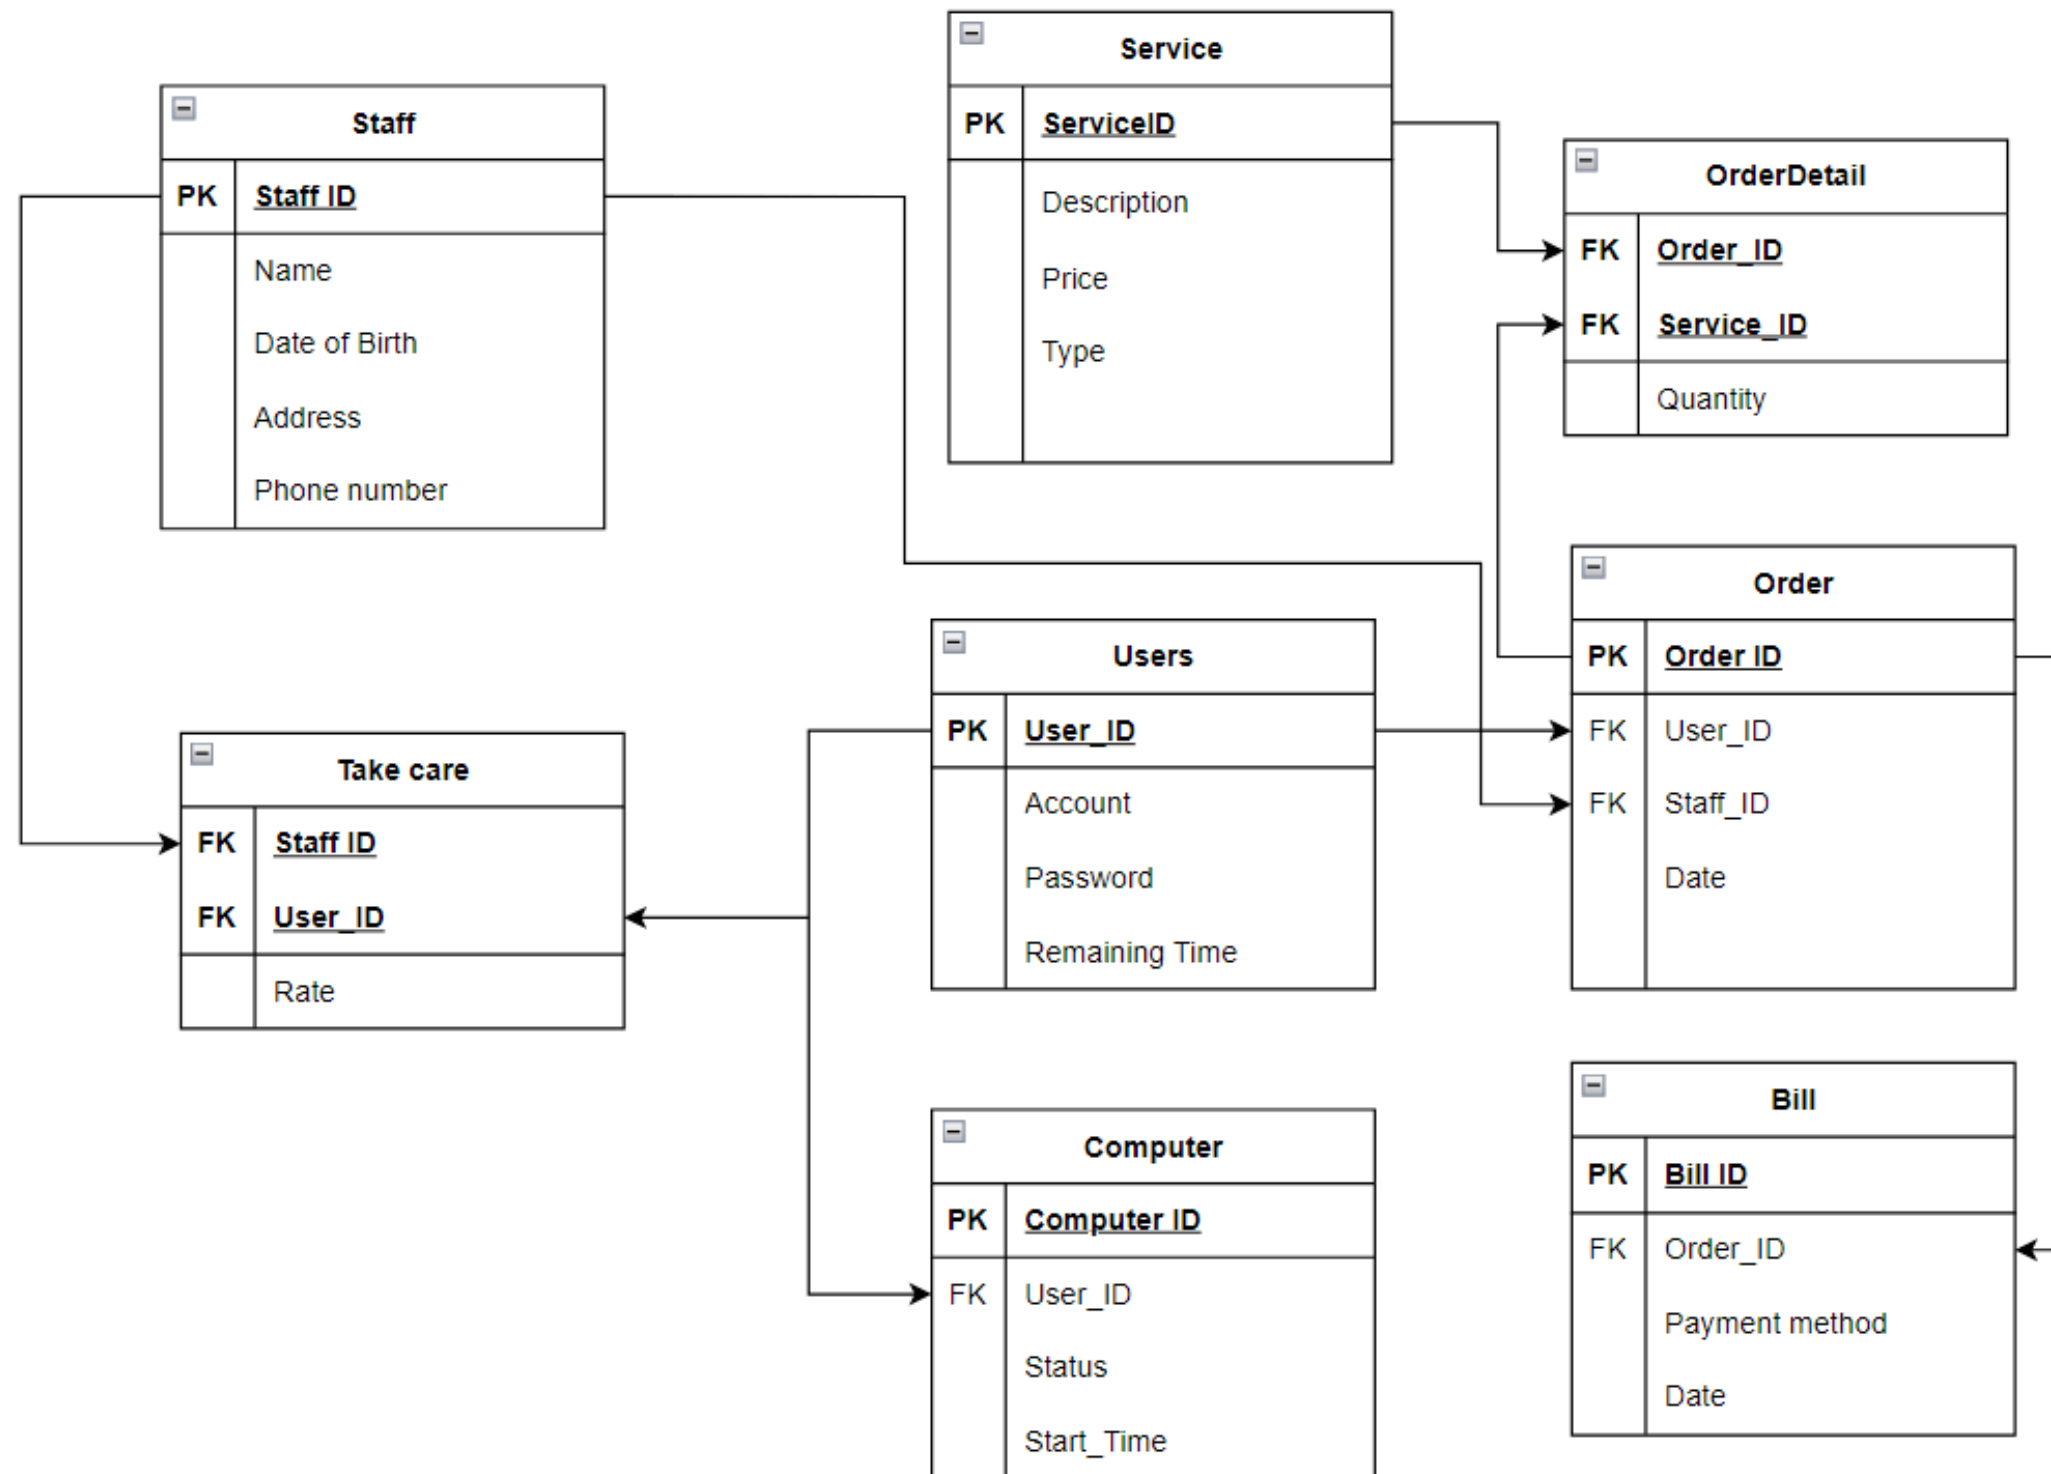

Illustrates the structure and behavior of classes in a system.
